

LOVE YOUR PET AND OUR PLANET

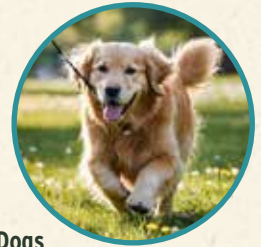

Directions of Use

For Cats

Spread Green Prairie Cat Health Indicator evenly into litter box before use. Urine will absorb into the product and the granules will change and hold colour. Observe and refer to the monitoring test colour chart to determine your cat's health.

For Dogs

When walking your dog bring a package of Green Prairie Dog Health Indicator. After your dog urinates, quickly pour indicating granules into soiled area letting the urine absorb into the product. The granules will quickly change color. Observe and refer to the monitoring test colour chart to determine your dog's health.

Introducing...

Pets can't tell you they're sick, but they can show you!

Our premium **Health Indicator for cats and dogs** are plant-based pH testing granules that are urine activated, changing color to proactively monitor the health of your pet.

- pH testing granules absorb urine and change different colors based on pH values.
- Granules are plant-based, biodegradable safe for use.
- Activates Immediately where silica takes up to 4 hours to perform.
- Acidic or alkaline urinary pH can indicate illness and disease and should be followed up with a visit to the vet.
